Berberis Mentorensis

(U. S. Plant Patent 99)

Stays green practically the entire year

A remarkably fine hedge plant that withstands heat and drought.

Berberis Mentorensis is the result of a cross between Barberry Thunbergi and Barberry Juliana. It has very rugged, strong, upright growing branches and quite formidable thorns. Its foliage is heavy and thick, and of perfect color—a green as dark as the Japanese Yew.

Its most valuable attribute is its ability to withstand heat and drought. Few other shrubs or hedge plants are able to go without water and withstand intense heat as Barberry Mentorensis and look as well. During the hottest weather there is never any sign of wilting or burning, much to the amazement of everyone.

Upright growth; easy upkeep (requires really no pruning) and its tenacious foliage, more than compensates for the lack of berries. We heartily recommend **Berberis Mentorensis** to you and claim it to be the best moderately priced and perfectly hardy hedge plant to date.

ROSES

Rose growing is one of our specialties. We produce large quantities in wide assortment. With the exception of a few of the common climbers, all of our roses are low budded on multiflora japonica which is generally conceded to be the best all-around rose understock. The roots of this understock are fibrous and pliable and adaptable to most types of soil. Our method of propagating produces symmetrical well balanced plants with short shanks suitable either for pot or garden culture. All of our roses are graded carefully according to the standards of the American Association of Nurserymen.

Look over this list and note the fine assortment offered.

Prices quoted are for 2 year No. 1 grade. See the following schedule for prices of No. 1½ roses:

Roses which sell at	{	16.00 18.00 20.00 22.00	{	per 100 for No. 1 will be	{	12.00 14.00 15.00 16.00	{	per 100 for No. 1½.

300 Darwin Tulips

Six Named Varieties
IN DISPLAY BOX **\$10.00**

RETAIL PRICE (60c per dozen) \$15.00

You make 50% Profit

Darwin Tulips are by far the most popular of Spring-blooming bulbs. Their large, gorgeously colored flowers displayed on tall sturdy stems make them universally admired. You will find a ready sale for them at a handsome profit. Planting season begins in September and continues until the ground freezes solid. The bulbs bloom the following spring.

In this display box, which is attractively decorated in two colors, you get six of the best known, fastest selling varieties, covering the complete color range. Each variety is in a separate compartment, labeled with the name and color. On the front of the box are COLORED PICTURES OF EACH VARIETY. We believe this is the only Tulip Display Box on the market with this feature.

AFTERGLOW. Deep rosy orange
BARTIGON. Fiery red
CLARA BUTT. Clear, soft salmon pink
FARNCOMBE SANDERS. Scarlet with white base
INGLESCOMBE YELLOW. Glossy canary yellow
PRIDE OF HAARLEM. Old rose

This box is the simplest and most effective method devised for offering bulbs in retail stores. No chance to get them mixed. Occupies only 8 x 20 inches of counter space. Three months selling season.

Planting instructions accompany each box. Refill orders booked at \$3.25 per 100 bulbs in lots of 50 of a variety.

Terms, 2 per cent ten days, net 30 days, to those of established credit; others, cash in advance or C. O. D. . Shipped by express.

A big, sure profit awaits you in this Bulb Box. Order one or more today.

FRUIT TREE SEEDLINGS

For many years we have specialized in the production of Fruit Tree Seedlings both in the Kaw Valley of Kansas and in the Pacific Northwest. These two sections are recognized as the best locations in America for the production of fruit tree seedlings. Together they account for the major portion of all seedlings produced.

LONICERA HECKROTTI "GOLDFLAME" (Trade Mark)

Immense, showy clusters of trumpet-shaped buds and fragrant blooms. The outside of the petals is brilliant flame-pink, while the inside is a creamy golden yellow. Dark glossy foliage adds to the charm of "Goldflame." The plants can be sheared to form a hedge or allowed to grow naturally as a vine or shrub. They bloom freely from early spring until cut down by heavy frost.
